SUMMARY

First Class Computer Science graduate with hands-on experience in machine learning, data analysis, and software development. Proven leadership and technical troubleshooting skills developed through hospitality and retail tech support roles. Adept at working under pressure, improving systems, and bridging technical and non-technical teams. Eager to apply analytical and communication strengths in tech support, data, or junior developer roles.

EDUCATION

University of Greenwich

London, UK

Bachelor of Computer Science

First Class Honours 2025

- Relevant Coursework: Advanced Programming, Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Statistical Techniques with R, Paradigms of Programming.

Gujarat Higher Secondary Education Board (HSC)

Gujarat, India

A-Level Equivalent Qualifications in Science

Graduated with Distinction

- Achieved top grades in core subjects, including Mathematics, Physics, Chemistry, and Computer Science.
- Coursework emphasized problem-solving, analytical skills, and foundational programming.

PROFESSIONAL EXPERIENCE

Bar Supervisor – Operations and Compliance

Mar. 2024 – Sep. 2024

ArcadeX, Battersea Power Station, London

UK

- Led a team of 10–15 staff, driving a 30% improvement in service speed by introducing structured shift training.
- Streamlined POS processes and reduced transaction errors by coordinating closely with IT and ops leads.
- Created tracking sheets and digital forms (Google Sheets, Excel) to analyze customer service metrics.

Retail Systems Support Assistant (Event-based)

Oct. 2022 – Present

Wembley Stadium, Emirates Stadium, Flannels Oxford Street

London, UK

- Conducted POS system checks and restarts during retail events, escalating issues to remote IT.
- Managed inventory using handheld scanning systems and front-end merchandising tools.
- Supported digital-physical pricing alignment and ensured real-time stock availability.

PROJECTS

Emotion Recognition Platform for ASD | CNN, Transformer, TensorFlow.js, PyTorch

Sep. 2024 – Apr. 2025

- Built three custom AI models for facial, speech, and text-based emotion recognition using CNNs and Transformers.
- Integrated models into a locally hosted web application for Autism Spectrum Disorder (ASD) users, focusing on emotion regulation.
- Applied advanced data augmentation to enhance model robustness for small, sensitive datasets.
- Enabled real-time inference on the browser using TensorFlow.js and Face-API.js for client-side privacy.
- Architected the app with adaptive CBT tools and modular UX, tailored for accessibility and ethical AI deployment.

London Underground Route Optimizer | Python, NetworkX, Tkinter, Graph Theory

Jan. 2024 – Apr. 2024

- Built a GUI-based tool to compute shortest paths across London Underground using Dijkstra's and A* algorithms.
- Simulated network failures (e.g., closed routes) and dynamically updated available paths.
- Performed comparative analysis of algorithm performance, and documented results in a comprehensive report.

Nutritional Supplement Impact Study | R, ggplot2, fitdistrplus, Statistical Inference

Feb. 2024 – May 2024

- Simulated biological datasets using normal and Weibull distributions to analyze the effect of supplements on lab animals.
- Used t-tests, Wilcoxon tests, and distribution fitting (Weibull, Gamma, Lognormal) to derive statistical significance.
- Visualized results via density plots, boxplots, Q-Q plots, and CDF/P-P comparisons.

Twitter Sentiment Analysis | RoBERTa, PyTorch, Optuna, NLP

Nov. 2023 – Jan. 2024

- Fine-tuned RoBERTa transformer model to classify airline tweet sentiment into positive, negative, and neutral.
- Achieved 85.2% F1-score; compared performance against Logistic Regression and Naive Bayes.
- Used Optuna for hyperparameter optimization and analyzed results using precision, recall, and confusion matrices.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL (PostgreSQL, MySQL), Java, C++, Scala, Bash

Data Science & Machine Learning: pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Matplotlib, seaborn, NLTK, OpenCV

Big Data & Cloud Platforms: Apache Spark, AWS (S3, EC2, Lambda), Google Cloud Platform (BigQuery, Vertex AI), Azure ML

Frameworks & Tools: Flask, FastAPI, Streamlit, Tableau, Power BI, Plotly, Dash, Docker, Airflow, Kubernetes

Version Control & CI/CD: Git, GitHub Actions, Jenkins, TravisCI

Development Tools: Jupyter Notebook, Anaconda, PyCharm, IntelliJ IDEA, VS Code, Postman, Figma

Other Skills: Data Wrangling, Data Visualization, Feature Engineering, NLP, Deep Learning, Distributed Computing, Statistical Modeling, A/B Testing, Time Series Analysis
